EDUCATION

- Master of Science, Health Technology (Human-Computer Interaction Concentration) - GPA: 4.0/4.0** August 2026
University of Illinois Urbana-Champaign Champaign, IL
- Relevant Coursework: UI/UX, Human-Computer Interaction, Data Analysis, Human Factors, Software Engineering
- Bachelor of Science, Kinesiology and Health** May 2025
The University of Texas at Austin Austin, TX
- Minor in **Sports Performance Analytics and the Business of Sports**
 - Relevant Coursework: Biomechanics, Human Physiology & Anatomy, Neuromuscular Control, Sports Data Analytics

WORK EXPERIENCE

- Graduate Research Assistant** May 2025 - Present
University of Illinois Urbana-Champaign (UbiHealth Lab) Champaign, IL
- Led usability testing of a smartphone mobility app with 20 participants to evaluate navigation flow and task clarity
 - Analyzed multi-modal data, including IMU sensors, video recordings, and user interactions, to identify task failure points
 - Translated user needs and usability findings into interface refinements that reduced errors and streamlined workflows
- Graduate Research Assistant** October 2025 - May 2026
University of Illinois Urbana-Champaign (Siebel Center for Design, Assessment & Research Team) Champaign, IL
- Identified workflow breakdowns in engineering course platforms through mixed-methods UX research with 100+ students
 - Analyzed qualitative and quantitative usability data using Excel and Python to uncover digital course friction points
 - Delivered actionable design recommendations to stakeholders, informing iterative interface improvements
- Undergraduate Research Assistant** January 2024 - May 2025
The University of Texas at Austin (Neuromuscular Physiology Lab) Austin, TX
- Collected and processed 100+ EMG datasets to support investigations of neuromuscular control and fatigue
 - Conducted statistical analyses (ANOVA, t-tests) to identify performance patterns across experimental conditions
 - Synthesized findings into structured reports that contributed to movement science and experimental design decisions
- Desk Assistant** June 2022 - May 2025
The University of Texas at Austin, Housing and Dining Austin, TX
- Managed front-desk operations serving 100+ residents per semester with high accuracy and rapid issue resolution
 - Resolved housing conflicts and service requests through clear, empathetic communication across phone and in-person
 - Streamlined check-in/out documentation processes to improve operational efficiency during peak periods

SELECTED PROJECTS

- MindfulMeals – HFES Student Mobile Health App Competition Finalist** October 2025 - March 2026
- Designed a human-centered mHealth app concept to support adults with early cognitive changes during cooking tasks
 - Applied UX methods (personas, ideation, journey mapping, Figma prototyping) to develop core user flows and features
 - Conducted user research and translated user needs into features supporting usability, safety, and clinical relevance

LEADERSHIP & COMMUNITY INVOLVEMENT

- Membership Director - Human Factors and Ergonomics Society Student Chapter** October 2025 - Present
- Led recruitment efforts that increased chapter membership by 20% through outreach and engagement events
 - Managed weekly communications and analyzed trends to increase retention and attendance by 15%

SKILLS

UX Research: UX Research, Usability Testing, User Interviews, Survey Design, Mixed-Methods Research, Quantitative Research, Heuristic Evaluation, A/B Testing

UX/UI Design: Figma, Adobe XD, Wireframing, User Flows, Interaction Prototyping, Design Systems, Accessibility

Data & Programming: Microsoft Excel, Python, MATLAB, RStudio, SQL, JavaScript, Pandas, TensorFlow

Statistical Analysis: Regression, ANOVA, T-tests, Classification, Clustering, Data Visualization
