EDUCATION

Master of Science, Health Technology (Human-Computer Interaction Concentration) - GPA: 4.0/4.0

August 2026

University of Illinois Urbana-Champaign

Champaign, IL

- Relevant Coursework: UI/UX, Human-Computer Interaction, Data Analysis, Human Factors, Software Engineering

Bachelor of Science, Kinesiology and Health

May 2025

The University of Texas at Austin

Austin, TX

- Minor in **Sports Performance Analytics and the Business of Sports**

- Relevant Coursework: Biomechanics, Human Physiology & Anatomy, Neuromuscular Control, Sports Data Analytics

WORK EXPERIENCE

UX Research Associate

May 2025 - Present

University of Illinois Urbana-Champaign (UbiHealth Lab)

Champaign, IL

- Led moderated usability testing with 20 participants to evaluate navigation flow, task completion, and user pain points
- Designed interface mockups, wireframes, and user flows to translate usability insights into prototype improvements
- Translated user needs and usability findings into product requirements, user stories, and acceptance criteria
- Collaborated with developers to create User Acceptance Testing (UAT) plans and validate features before deployment

Graduate Research Assistant

October 2025 - May 2026

University of Illinois Urbana-Champaign (Siebel Center for Design)

Champaign, IL

- Identified workflow breakdowns in engineering course platforms through mixed-methods UX research with 100+ students
- Analyzed qualitative and quantitative usability data using Excel and Python to uncover digital course friction points
- Created data visualizations to present usability findings to stakeholders and support iterative interface improvements

Desk Assistant

June 2022 - May 2025

The University of Texas at Austin (Housing and Dining)

Austin, TX

- Maintained accurate resident records for 100+ residents per semester with strong attention to detail and data integrity
- Resolved complex resident issues using problem-solving skills to identify root causes and implement effective solutions
- Planned resident events by coordinating logistics and scheduling to support smooth execution and engagement

SELECTED PROJECTS

MindfulMeals – HFES Student Mobile Health App Competition Finalist

October 2025 - March 2026

- Designed a human-centered mHealth app concept for adults with early cognitive changes during cooking tasks
- Synthesized user needs from personas, journey mapping, and task analysis to define task flows and prioritize features
- Created wireframes and interactive prototypes in Figma to demonstrate core user flows and screen interactions
- Translated user needs into design recommendations to support usability, safety, and clinical relevance

LEADERSHIP & COMMUNITY INVOLVEMENT

Membership Director - Human Factors and Ergonomics Society Student Chapter

October 2025 - May 2026

- Led recruitment efforts that increased chapter membership by 20% through outreach and engagement events
- Managed weekly communications and analyzed trends to improve user engagement, retention, and attendance by 15%
- Coordinated speaker events and professional development to strengthen member engagement and career readiness

SKILLS

UX Research: Usability Testing, User Interviews, Survey Design, Mixed-Methods Research, Heuristic Evaluation, Research Synthesis, Affinity Mapping, Task Analysis, Competitive Analysis, Formative Usability Testing

UX/UI Design: Human-Centered Design, Figma, Adobe XD, Wireframing, User Flows, Interaction Prototyping, Accessibility

Data & Programming: Microsoft Excel, Python, MATLAB, RStudio, SQL, JavaScript, Pandas, TensorFlow

Statistical Analysis: Regression, ANOVA, T-tests, Classification, Clustering, Data Visualization

Stakeholder & Product: Product Requirements, User Stories, Acceptance Criteria, UAT, KPIs, Product Roadmapping, Stakeholder Communication, Cross-Functional Collaboration, Project Coordination
